

Meshach Ando, FE

Jacksonville, FL | 904-749-2799 | meshachando.apply@gmail.com | linkedin.com/in/meshachando

PROFESSIONAL SUMMARY

Civil engineering graduate with 2+ years of experience in geotechnical engineering and construction materials evaluation. Experienced in Python, ArcGIS Pro, AutoCAD and Civil 3D. Passed FE Civil exam and scheduled to take the PE Civil: Geotechnical exam on June 23, 2026.

EDUCATION

University of North Florida, Jacksonville, FL Aug. 2024 – May 2026
M.S., Civil Engineering

Kwame Nkrumah University of Science and Technology (KNUST), Kumasi Aug. 2018 – Nov. 2022
BSc. Civil Engineering

PROFESSIONAL EXPERIENCE

Graduate Research Assistant Aug. 2024 – May 2026
University of North Florida *Jacksonville, FL*

- Led a \$40,000 EREF-funded landfill cover systems project evaluating how soil type, cover moisture and drainage performance affect methane oxidation in engineered landfill soils.
- Used Python and ArcGIS Pro to analyze stormwater infiltration, surface runoff and moisture accumulation across landfill cover systems.
- Conducted uncertainty analyses to evaluate how soil hydraulic behavior and drainage configuration affect moisture movement and landfill gas attenuation.

Staff Engineer Nov. 2022 – Nov. 2023
Kumasi Compost and Recycling Plant *Kumasi, Ghana*

- Supported civil works for plant expansion by reviewing foundation, slab and pavement conditions near waste sorting and asphalt processing operations.
- Evaluated vibration-related risks from plant equipment on nearby slabs, compacted working surfaces and equipment-support areas.
- Assisted with site observations and construction checks for reinforced concrete works, grading conditions and facility expansion activities.

Civil Engineering Intern, Geotechnical and Materials Sep. 2021 – Dec. 2021
Ghana Highway Authority, Materials Division *Ghana*

- Conducted geotechnical soil testing including Sieve Analysis, Atterberg Limits and moisture content testing under ASTM standards to classify soils for highway construction works.
- Performed field density testing and Proctor compaction checks to verify subgrade compaction for pavement layer construction.
- Assisted with California Bearing Ratio and asphalt material testing to support pavement design, construction quality control and materials reporting.

PROJECTS

Landfill Cover Soil and Gas Attenuation Study

Aug. 2024 – May 2026

Evaluated how landfill cover soil conditions, stormwater infiltration and drainage performance affect moisture movement, methane oxidation and gas attenuation in engineered landfill systems.

Highway Subgrade and Pavement Materials Evaluation

Sep. 2021 – Dec. 2021

Performed field and laboratory testing on soils, aggregates and pavement materials to support subgrade approval, compaction control and highway construction quality checks.

Golden Hills Mixed Development Project, Abira

Jan. 2021 – May 2021

Prepared drainage and sewerage discharge network designs using Autodesk Storm and Sanitary Analysis for a mixed-use development infrastructure project.

CERTIFICATIONS

FE Civil – Passed

Feb. 2026

PE Civil: Geotechnical Exam Scheduled

June 23, 2026

TECHNICAL SKILLS

Geotechnical and Materials: Soil classification, construction materials testing, field density testing, Proctor compaction, California Bearing Ratio, asphalt material testing

Construction and Field: Subgrade inspection, pavement layer evaluation, compaction observation, earthwork inspection, construction materials testing

Software: Python (Advanced), ArcGIS Pro (Advanced), Microsoft Excel (Advanced), AutoCAD (Moderate), Civil 3D (Beginner), HEC-RAS (Beginner), EPA SWMM (Beginner)

Data and Modeling: Uncertainty analysis, GIS analysis, environmental data analytics, statistical analysis, technical report preparation

PRESENTATIONS

Poster Presentation – Association of Environmental Engineering and Science Professors (AEESP) Conference

Mar. 2025

Environmental systems modeling and landfill emissions research.

Poster Presentation – Global Waste Management Symposium (GWMS)

Mar. 2026

Modeled and measured landfill methane emissions.
